REQUIREMENTS DOCUMENT

1. Project Title and Group Members

Project Name: Internship and Skill Management System

Group Members:

Meher Asif
Kashaf Bukhari
Sabila

2. Problem Description

Students often find it difficult to find internships. Internship details are shared on different websites and social media platforms. It is also difficult for students to know which skills they need to learn.
Our system will help students find internships, manage their skills, and check their application status. Companies can post internships, and the admin can manage the system.

3. Objectives and Intended Users

Objectives:
Help students find internships.
Allow students to add and update their skills.
Help students manage their profiles.
Allow students to apply for internships.
Help students check their application status.
Help students know which skills they need to improve.

Intended Users:

1. Students
Create an account.
Add their skills.
Search for internships.
Apply for internships.
Check their application status.

2. Companies
Post internship details.
View applications from students.
Check student information.

3. Admin
Manage student accounts.
Manage internship details.
Check that the system is working properly.

4. Functional Requirements

FR1: Students can create an account and log in.
FR2: Students can create and update their profiles.
FR3: Students can add, change, and remove their skills.
FR4: Students can view available internships.
FR5: Students can search for internships.
FR6: Students can apply for internships.
FR7: Students can check their application status.
FR8: Companies can post and update internship details.
FR9: Companies can view student applications.
FR10: Admin can manage users and internship posts.
FR11: The system can help students find skills they need to improve.

5. Non-Functional Requirements

NFR1: The system should be easy to use.
NFR2: The system should keep user information safe.
NFR3: The system should load pages quickly.
NFR4: The system should save information correctly.
NFR5: The system should work on common web browsers.
NFR6: The system should be easy to update and fix.
NFR7: The system should be available when its server is working.

6. Prioritized Features

ID	FEATURE	PRIORITY	STATUS
1	Student Registration and Login	High	To do
2	Student Profile Management	High	To do
3	Skill Management	High	To do
4	Internship Listings	High	To do
5	Internship Search and Filtering	Medium	To do
6	Internship Application Tracking	High	To do
7	Skill Gap Analysis	Medium	To do
8	Admin Dashboard	Medium	To do

7. Assumptions, Constraints, and Limitations

Assumptions

Students have internet access.
Companies will provide correct internship details.
Students will enter correct information.
Students will update their skills when needed.

Constraints

We have limited time to complete the project.
Our group has limited resources.
We will start with basic features.
We must use the tools and technologies selected for the project.

Limitations

The system may not check whether every internship is real.
Internship details depend on the information provided by companies.
Skill suggestions may not always be fully accurate.
The first version may not have advanced features.

Project Status: Requirements Phase (v0.1.0)
